

Express  $g \circ f$  as a single fraction hence evaluate it at  $x = 0$  if  $g(x) = 3x + 2$  and  $f(x) = \frac{1}{2-7x}$

## Answer Keys

**Day 118:**

$$g(x) = \frac{7 - 28x}{2 - 7x}$$

$$g(0) = \frac{7}{2}$$
